Scope: Computational Cybernetics is the synergetic integration of Cybernetics and Computational Intelligence techniques. Hence the topics of the ICCC covers not only mechanical, but biological (living), social and economical systems and for this uses computational intelligence-based results of communication theory, signal processing, information technology, control theory, the theory of adaptive systems, the theory of complex systems (game theory, operational research), and computer science.

Submission of Papers

The working language of the conference is English. Prospective authors are invited to submit a full paper (max. 6 pages in IEEE double column format) through electronic paper submission system. Papers sent by e-mail are not acceptable.
