

CALL FOR SPECIAL SESSION PAPERS

IEEE SAMI 2022

Special Session on Cybersecurity and 5G Cybersecurity

Poprad, Slovakia

March 2-5, 2022

<http://conf.uni-obuda.hu/sami2022/>

SAMI 2022 Special Session Chairs

Miklos Kozlovsky, Óbuda University, Budapest, Hungary
Anna Bánáti, Óbuda University, Budapest, Hungary
Zoltán Rajnai, Óbuda University, Budapest, Hungary
László Náday, Óbuda University, Budapest, Hungary

SAMI 2022 Founding Honorary Chair

Imre J. Rudas, Óbuda University, Budapest, Hungary

SAMI 2022 General Chairs

Levente Kovács, Óbuda University, Budapest, Hungary
Liberios Vokorokos, Technical University of Košice, Slovakia

More staff: <http://conf.uni-obuda.hu/sami2022/committees.html>

Organizers:

Technical University of Kosice, Slovakia
Óbuda University, Budapest, Hungary
University Research and Innovation Center (EKIK)
Antal Bejczy Center for Intelligent Robotics
Elfa
Slovak Academy of Sciences
SMC TC on Computational Cybernetics

IEEE Computational Intelligence Chapter of Czechoslovak Section

Sponsored by:

*IEEE Hungary Section
IEEE SMC Chapter, Hungary
IEEE Joint IES/RAS Chapter, Hungary
IEEE Control Systems Chapter, Hungary*

Technical Co-Sponsor:

IEEE SMC Society

<http://conf.uni-obuda.hu/sami2022/>

Full paper submission: **October 28, 2021**

Notification: **November 19, 2021**

Final paper submission: **January 30, 2022**

Introduction

New, complex systems (such as 5G or 6G) have started to deliver a novel mobile network architecture that not only providing near real-time communication with improved physical data rate, but also creates a new ecosystem allowing the deployment of novel services and applications. Cybersecurity with special areas such as 5G cybersecurity, automotive cybersecurity and IoT cybersecurity is a challenging research field. A key target for safe and reliable future networks will be to improve support not only for classical mobile broadband applications and services but also for vertical industry (e.g. Intelligent Transport, Industrial IoTs, eHealth, etc.) and other mobility-based services. This special session aims to bring cybersecurity experts from industry, academia and research to exchange their vision as well as their achieved advances in cybersecurity focusing on 5G and beyond.

Special Session Indicative Topics/Areas

Original research articles and reviews are sought in the overall topical area of cybersecurity and 5G/6G communication, including but not limited to:

- Cybersecurity and 5G/6G cybersecurity
- Privacy and 5G/6G privacy
- Positioning and 5G/6G positioning
- 5G/6G and robotics
- Automotive cybersecurity and 5G/6G
- 5G/6G technologies, applications and services
- IoT cybersecurity and 5G/6G
- 5G/6G hardware and test measurements

Submissions

All submissions should comply with the formatting requirements of IEEE (4-6 pages):

www.ieee.org/conferences/publishing/templates.html

All papers go through the complete peer review procedure. Submission is possible via the website: <http://conf.uni-obuda.hu/sami2022/paper.html>

Conference proceedings that meet IEEE quality review standards may be eligible for inclusion in the IEEE Xplore Digital Library. IEEE reserves the right to exclude a paper from distribution after the conference (e.g., removal from IEEE Xplore), if the paper is not presented at the conference. 'Pay to publish' is not allowed by IEEE. So at least one author of a paper must show up and present the paper at the conference. The symposium is organized as a part of Hungarian Scientific Season
