

Systems of Systems Engineering: Past, Present and Future

This 15th Annual Systems of Systems Engineering Conference provides an ideal opportunity to step back and review progress and prospects for systems of systems engineering (SoSE). The presentation will discuss the origins of SoSE and the early work that defined the foundations of the field. It will review progress over the years in SoSE concepts, methods and applications including the effect of changing technology on the nature of systems of systems engineering approaches. Finally, the presentation will look forward – at the future opportunities and direction for SoSE.
